

Desplegar un recurso real y medir su coste en Azure

Autor: Christian Salguero Varas

Fecha: 22/09/2026 - 23/09/2026 - 24/09/2026

1. Estimar el coste antes de desplegar

Para esta estimación necesitas estos tres componentes:

- Virtual Machines
- Managed Disks
- IP Addresses

A tener en cuenta: la calculadora está en euros (€) y Azure al tenerlo en Inglés está en dolares (\$).

Configuramos la máquina con los valores indicados.

Virtual Machines: Mi máquina virtual

1 B2ls v2 (2 vCPUs, 4 GB RAM) x 72 Hours (Pay ...)

Upfront: €0.00

Monthly: €2.82

Annual: €33.83

Escenario	Horas de cómputo	Coste cómputo (mensual)	Coste disco	Coste IP	Total estimado
A. VM encendida todo el laboratorio	72	2,82€	0,20€	0,31€	3,33€
B. VM con apagado automático nocturno (≈ 12 h/día)	36	1,41€	0,20€	0,31€	1,92€
C. VM encendida solo 8 h en total	8	0,31€	0,20€	0,31€	0,82€

Creación del Resource Group

En Azure accedemos a **Resource groups** y creamos el grupo de recursos con la siguiente información:

Create a resource group ...

Basics

Tags

Review + create

Resource group - A container that holds related resources for an Azure solution. The resource group can include all the resources for the solution, or only those resources that you want to manage as a group. You decide how you want to allocate resources to resource groups based on what makes the most sense for your organization. [Learn more](#)

Resource

vnet-spaincentral-1 (Virtual network)
5 to be added ⓘ

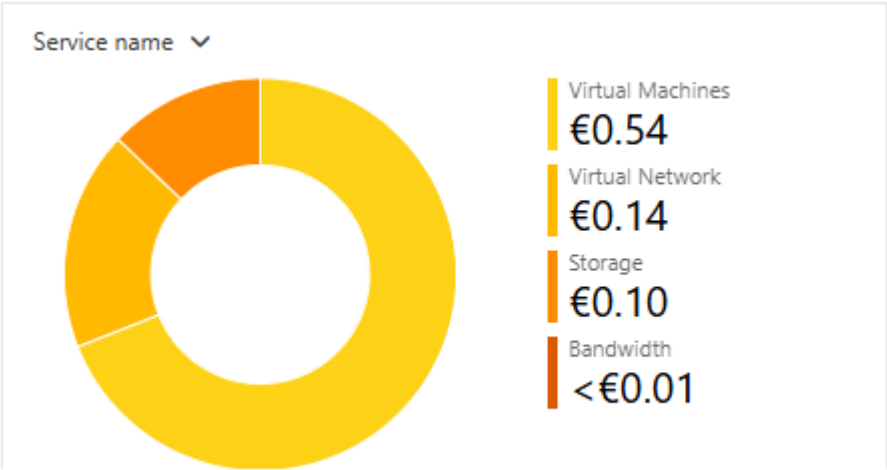

Primera revisión en Cost Analysis

Recurso	Coste acumulado
Máquina virtual	0.16€
Disco	0.03€
IP pública	0.05€
Otros	0.01€
Total (Actual Cost)	0.25€

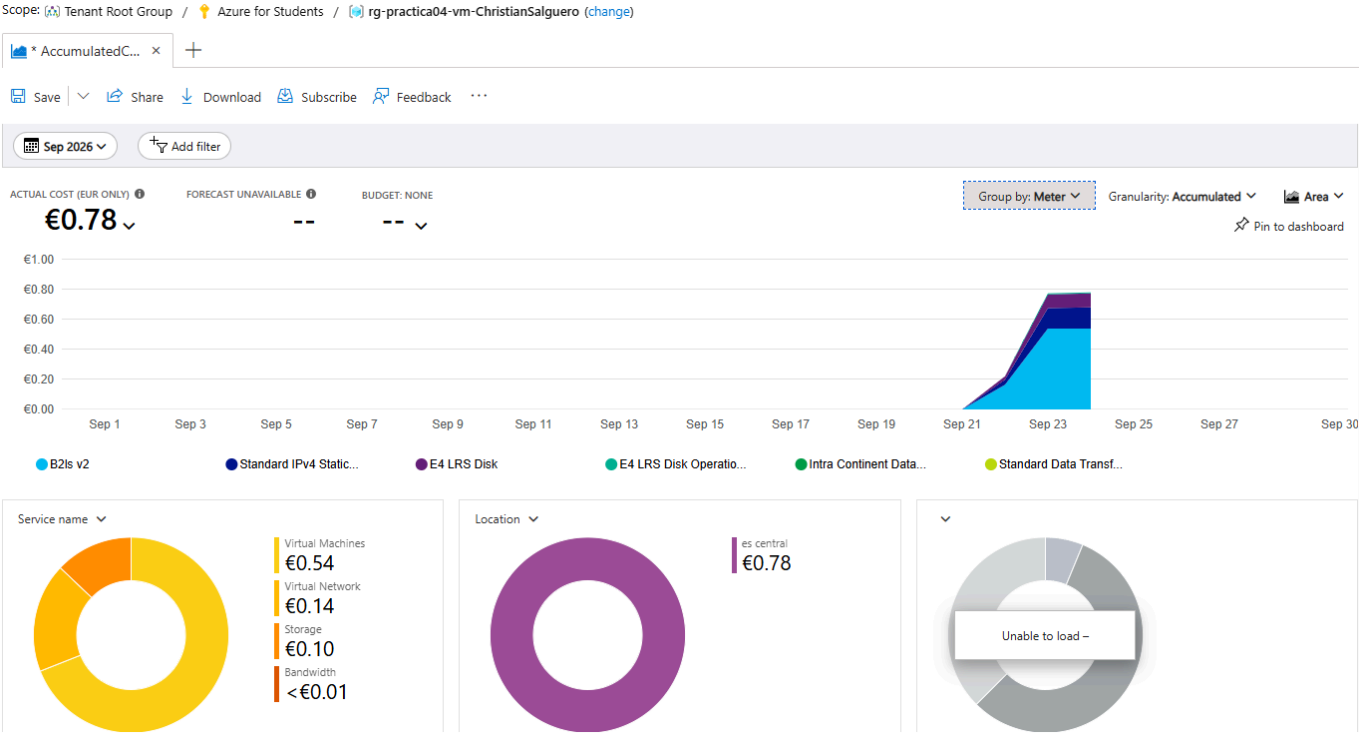

Segunda revisión en Cost Analysis

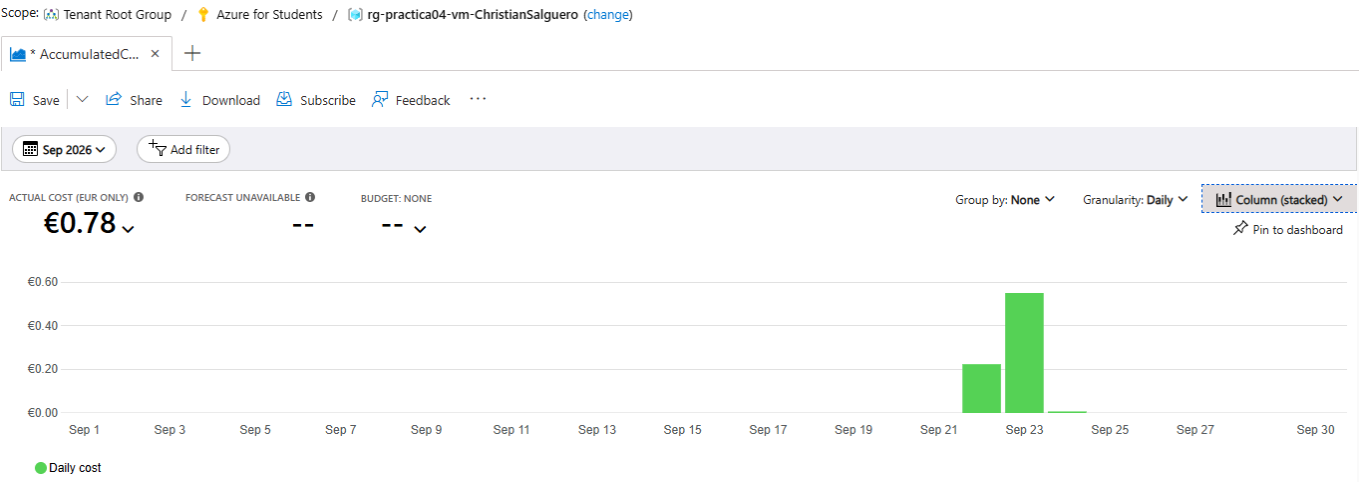

Recurso	Coste acumulado
Máquina virtual	€
Disco	€
IP pública	€
Otros	€
Total (Actual Cost)	€

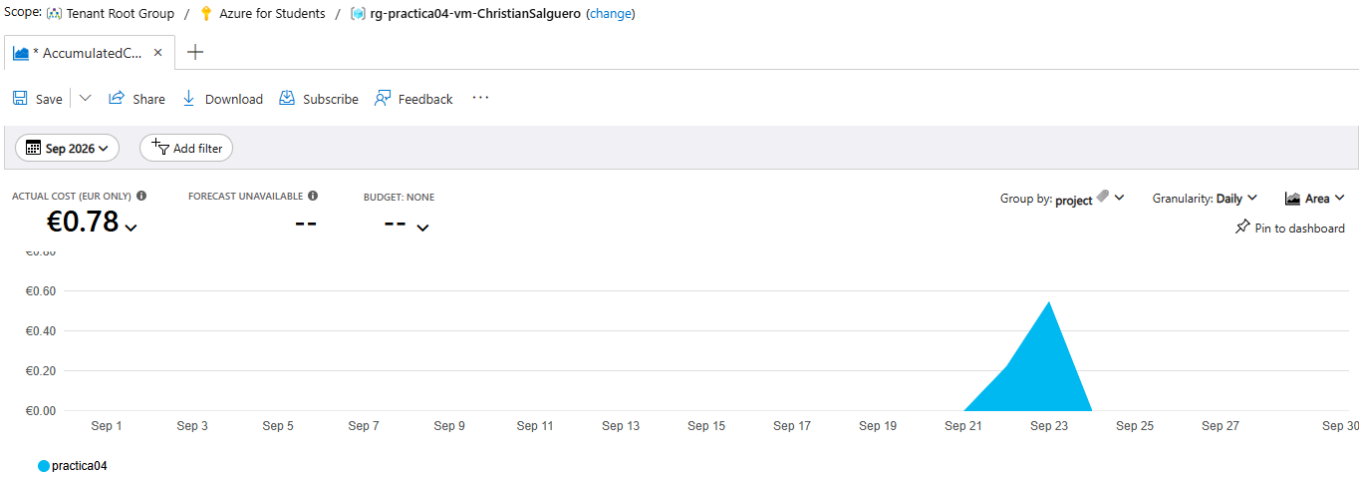

Ver el coste por medidor

Ver el coste diario

Ver el coste por Tag

Consultar la previsión

No se puede visualizar la previsión de forecast porque indica que 3 días es insuficiente para calcularlo.

Dato	Valor
Actual Cost	0.78€
Forecasted Cost (fin de mes)	No disponible
Budget del laboratorio	2€
¿Actual supera el Budget?	No
¿Forecast supera el Budget?	Sí/No

Revisar las alertas

No se ha activado ninguna ya que lo máximo que se ha llegado a gastar ha sido 0.78€ que queda lejos de 1€.

Alerta	¿Se ha activado?	Fecha y hora
Actual 50%	No	n/a
Actual 80%	No	n/a
Actual 100%	No	n/a
Forecasted 100%	No	n/a

Experimento: apagar no es lo mismo que desasignar

Comparar estimación y coste real

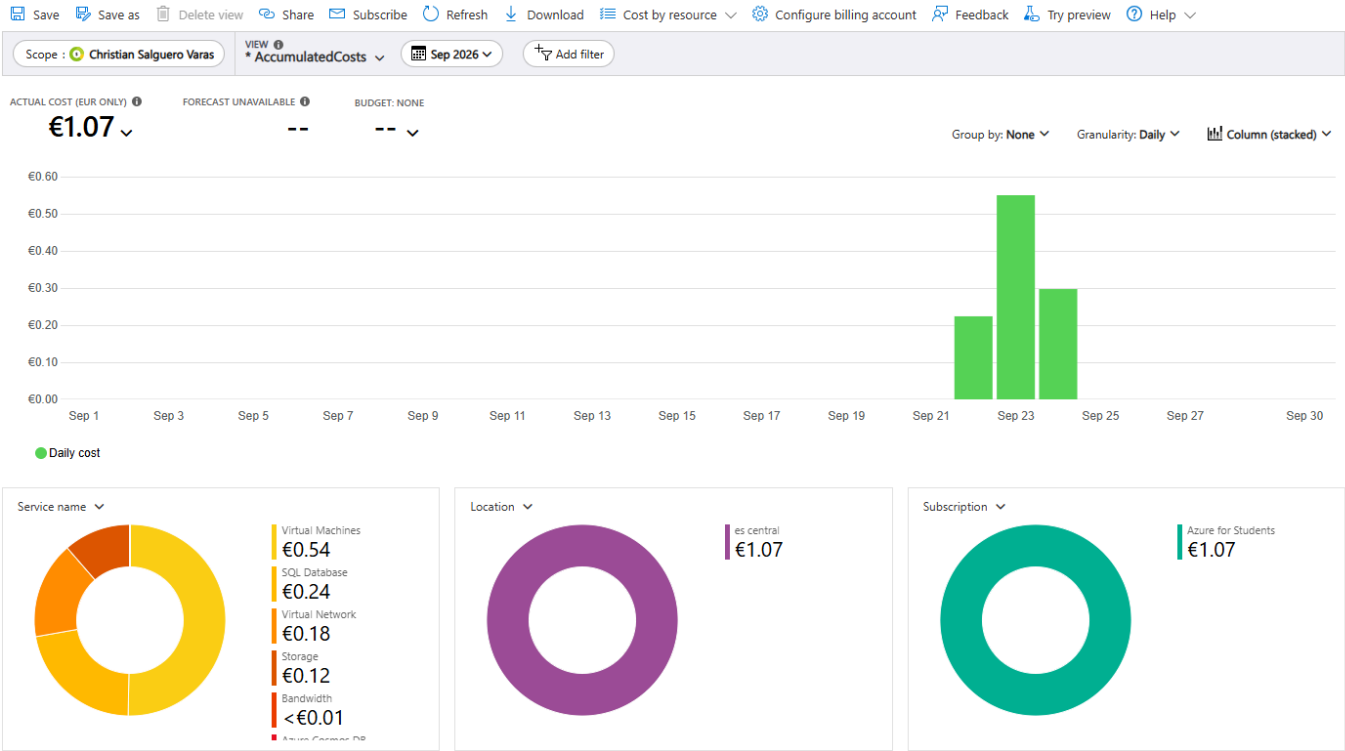

Se está comparando con la estimación B. También hay que tener en cuenta que la máquina ha sido apagada por las noches y encendida por el día.

Concepto	Estimado (Sección 3)	Real (Cost Analysis)	Diferencia
Cómputo	1,41€	0,54€	0,87€
Disco	0,20€	0,10€	0,10€
IP pública	0,31€	0,14€	0,17€
Total	1,92€	0,78€	1,14€

Verificación día final (día 4)

Podemos ver que el cuarto día (25/09/2026) hay un gasto de 0.0€. También se puede observar que el gasto del día anterior es mayor que las capturas anteriores, y esto es debido a otras prácticas realizadas sobre SQL,

etc.

Limpieza

Eliminamos el Resource Group.

Informe final

Elemento	Resultado
Nombre de la práctica	Práctica 04 — VM Linux con control de costes
Resource Group	rg-practica04-vm-alumnoXX
Servicios utilizados	Virtual Machine, Managed Disk, Public IP, Virtual Network
Coste estimado antes de desplegar	1,92€
Budget disponible	2,00€
Alertas configuradas	Actual 50% (1,00 €), Actual 80% (1,60 €), Actual 100% (2,00 €) y Forecasted 100% (2,00 €)
Alertas activadas	Ninguna (el gasto máximo fue de 0,78€)
Coste observado	0,78€
Recurso con mayor coste	Máquina virtual / Cómputo (0,54 €)
Recursos eliminados	Todos los recursos del Resource Group (rg-practica04-vm-alumnoXX) eliminados completamente al finalizar el Día 3
Observaciones	El coste real (0,78 €) fue inferior al estimado (1,92 €) debido a que la Virtual Machine permaneció encendida menos de las 36h previstas. El auto-shutdown no estaba disponible en la región Spain Central, por lo que el apagado lo hice manualmente. Las alertas no se llegaron a disparar y el pronóstico (Forecast) no estuvo disponible por falta de histórico.

Ejercicio final

Un equipo de DataNova Engineering despliega cinco VMs de pruebas con esta configuración:

Budget del proyecto	= 50 €
Actual Cost (día 10 del mes)	= 22 €
Forecasted Cost	= 68 €
Apagado automático	= No configurado
Estado de 3 VMs	= Stopped (no deallocated)

Responde:

1. ¿Qué alertas se habrán activado con umbrales Actual 50 %, 80 %, 100 % y Forecasted 100 %?

Se ha activado el Forecasted al 100% ya que ahora mismo el Forecasted Cost es mayor que 50€. El resto de alertas no se han activado.

2. ¿Por qué el Forecasted Cost es tan superior al Actual Cost?

Porque el Actual Cost es de 22€ y representa únicamente los gastos acumulados en los primeros 10 días del mes. Azure toma ese ritmo de consumo actual y lo proyecta para todo el mes (el resto de 20 días).

3. ¿Qué parte del gasto de las 3 VMs detenidas se podría eliminar sin borrarlas?

Al cambiar el estado de las VMs de Stopped (apagadas desde su sistema operativo) a Stopped (Deallocated) (desasignadas desde el portal de Azure), Azure libera los recursos hardware y deja de cobrar el cómputo por horas. El disco y la IP pública asignada seguirán cobrándose mientras existan.

4. Ordena estas acciones de mayor a menor impacto en el ahorro inmediato:

- [1] Desasignar las 3 VMs detenidas. (Elimina inmediatamente el cobro por hora del cómputo de 3 máquinas que no se están usando).
- [2] Configurar apagado automático en las 5 VMs. (Reduce masivamente las horas de cómputo activas).
- [3] Cambiar los discos de Premium SSD a Standard SSD. (Ahorro permanente en el almacenamiento).
- [4] Eliminar las IP públicas que no se usan. (Ahorro continuo menor por IP pública reservada).
- [5] Añadir Tags a todos los recursos. (Impacto nulo en el coste directo).

5. ¿Cuál de las acciones anteriores no ahorra dinero pero es imprescindible para analizarlo?

Añadir Tags a todos los recursos.

Aplicar etiquetas no reduce la factura de Azure, pero es un paso indispensable para tener controlado el gasto por proyecto, departamento, etc. Y detectar qué recursos o equipos están generando más gastos.
